Objective:

My main goal and career path are to work in the mental/ behavioral health industry. If given the opportunity, I would love to be able to prove my skills/abilities/ knowledge towards the current behavioral health technician positions which are available, that I am more than confident & qualified to perform.

Skills:

- Knowledge of implementing an Individual Service Plan (ISP) and all the roles each person plays in them, along with the ability of taking daily notes and weekly reviews.
- Able to conduct and perform the role in interdisciplinary treatment team meetings and provide treatment throughout the client's care.
- Can assess crisis interventions and de-escalation of situations for importance of safety.
- Utilize counseling and psychotherapy to evaluate and treat emotional/ mental problems and conditions with excellent verbal/ written communication skills. (Cognitive, Behavioral, Affective, etc.)
- Ability to monitor and assess client behaviors and report problems/observations in professional case notes, maintain all data collection logs/ graphs, and complete the documentation for clinical records.
- Aware and meet the standards of all state and federal laws, regulations, and guidelines in provision of client services as a role of the technician.
- Studied in Psychopharmaceuticals and know the information on medications and their benefits, side effects, etc.
- Demonstrate verbal interaction techniques commonly used, and establishing successful therapeutic interventions/ positive behavior support plans with service recipients in the mental health/developmental services.
- Know the characteristics of behavior modification and can record behavioral data using various methods including interval, continuous, and time sampling methods, can conduct a baseline behavioral assessment and functional behavioral analysis.
- Able to define/ describe/ perform positive reinforcement, extinction, shaping, fading, schedules of reinforcement and punishment, and implement behavioral treatment plans demonstrating the ABC model.
- Can increase desired targeted human behavior and/or to decrease/prevent maladaptive human behavior.
- Learned the social stigma, major diagnostic categories, common treatment issues, and development of all treatment plans related/ corner stoned to mental illness.
- Can demonstrate the scope of service duties of the technician, including responsibilities for program implementation, as well as general care and supervision of service recipients to assure a clean and safe environment.
